

Cloud Data Exchange for Amazon is a fully cloud-based integration solution that will revolutionise data communication within your business.

The **Amazon Cloud Data Exchange connector** allows you to connect and integrate Amazon with several other types of business applications, such as ERP, Accounting and CRM systems. With the ability to transfer data in real-time, or at customisable intervals, you have full flexibility to control where and when data is transferred.

What can Cloud Data Exchange allow your Amazon platform to do?

The Amazon Cloud Data Exchange connector offers you a comprehensive, reliable and customisable solution to connect your Amazon platform directly to your back-end systems such as Xero, QuickBooks, NetSuite, Sage and Freshdesk.

Connect your Amazon seller account with a wide variety of other platforms, both in the cloud and on-premise.

Receive email notifications for error reporting.

Integrate customer and order information from your Amazon store.

The following can be automated using Cloud Data Exchange for Amazon;

AMAZON
Export Orders
Export Reports
Export Inventory

Main Features and Benefits:

-  **Save Time and Money**
Remove the need for the time-consuming manual transfer of data.

-  **Make Informed Decisions**
Get real-time reports instantly whenever and wherever you are, helping you make fast-paced informed decisions.

-  **Cloud-Based**
being on the Google Cloud Platform means no need for downloads or updates.

-  **Free 30-Day Trial**
peace of mind that Cloud Data Exchange is the right product for you with our no obligation free trial.

-  **Integrate Multiple Systems**
connect Amazon to multiple business systems.

-  **Configurable**
customise our off-the-shelf integrations to meet the needs of your business. If we don't already offer the connector you require, we can work with you to produce this.

-  **Security**
being based on the Google Cloud Platform means your data is secure.

-  **Easy to Set-Up**
no need to be an IT expert to get Cloud Data Exchange up and running with our pre-configured mapping, eliminating costly development and implementation fees.
