

**Cloud Data Exchange for QuickBooks is a fully cloud-based integration solution that will revolutionise data communication within your business.**

The **QuickBooks Cloud Data Exchange** connector allows you to connect and integrate QuickBooks with several other types of business application such as ecommerce, ERP and CRM systems. With the ability to transfer data in real-time, or at customisable intervals, you have full flexibility to control where and when data is transferred.

**What can Cloud Data Exchange allow your QuickBooks system to do?**

The QuickBooks Cloud Data Exchange connector allows you to connect and integrate Quickbooks with several types of business systems such as Salesforce, Amazon, eBay, Shopify and NetSuite.

- Sync QuickBooks data such as accounts, invoices and customers to and from your ERP, CRM, marketing and ecommerce platforms.
- Handle multiple QuickBooks companies.

- Export customers, items and invoices to Magento, eBay or other ecommerce platforms.
- Receive notifications in real time, keeping you instantly up to date.

**The following can be automated using Cloud Data Exchange for QuickBooks;**

IMPORT	EXPORT
Customers	Customers
Invoices	Items
Credit Memos	Invoices
Payments	Accounts
Sales Receipts	Credit Memos
Items	Payments
Vendors	Purchase Orders
	Sales Receipts

**Main Features and Benefits:**
