

sage 200

Cloud Data Exchange for Sage 200 is a fully cloud-based integration solution that will revolutionise data communication within your business.

The Sage 200 Cloud Data Exchange connector allows you to connect and integrate Sage with several other types of business application. With the ability to transfer data in real-time, or at customisable intervals, you have full flexibility to control where and when data is transferred.

What can Cloud Data Exchange allow your Sage 200 platform to do?

Streamline and automate processes, giving you more time to focus on running your business.

Automatically sync customers and sales orders to your Sage 200 system.

Export customers and products to other platforms such as eBay and Magento stores.

Handle multiple Sage 200 instances.

Receive email notifications for error reporting.

Import customers and sales orders into Sage 200.

Update customers and products from several locations in ecommerce systems such as Amazon, eBay and Magento.

The following can be automated using Cloud Data Exchange for Sage 200:

IMPORT	EXPORT
Customers	Customers
Sales Orders	Sales Orders
Products	Products
	Stock Levels
	Suppliers
	Price Bands
	Purchase Transactions

Main Features and Benefits:

- 
Save Time and Money
 Remove the need for the time-consuming manual transfer of data.
- 
Make Informed Decisions
 Get real-time reports instantly whenever and wherever you are, helping you make fast-paced informed decisions.
- 
Cloud-Based
 Being on the Google Cloud Platform means no need for downloads or updates.
- 
Free 30-Day Trial
 Peace of mind that Cloud Data Exchange is the right product for you with our no obligation free trial.
- 
Integrate Multiple Systems
 Connect Sage 200 to multiple business systems.
- 
Configurable
 Customise our off-the-shelf integrations to meet the needs of your business. If we don't already offer the connector you require, we can work with you to produce this.
- 
Security
 Being based on the Google Cloud Platform means your data is secure.
- 
Easy to Set-Up
 No need to be an IT expert to get Cloud Data Exchange up and running with our pre-configured mapping, eliminating costly development and implementation fees.
