

Cloud Data Exchange for Xero is a fully cloud-based integration solution that will revolutionise data communication within your business.

The **Xero Cloud Data Exchange** connector allows you to connect and integrate Xero with several other types of business application such as ecommerce, ERP and CRM systems. With the ability to transfer data in real-time, or at customisable intervals, you have full flexibility to control where and when data is transferred.

What can Cloud Data Exchange allow your QuickBooks system to do?

The Xero Cloud Data Exchange allows you to fully automate existing import and export processes. This will streamline your existing processes and add extra value to your Xero platform.

Sync Xero data such as invoices and items to and from your ERP, CRM, marketing and ecommerce platforms.

Receive notifications in real-time, keeping you instantly up-to-date

Export payments, invoices, contacts, items and accounts to Magento, eBay or other ecommerce platforms.

The following can be automated using Cloud Data Exchange for QuickBooks;

IMPORT	EXPORT
Items	Payments
Invoices	Invoices
	Contacts
	Items
	Accounts

Main Features and Benefits:

-  **Save Time and Money**
Remove the need for the time-consuming manual transfer of data.

-  **Make Informed Decisions**
Get real-time reports instantly whenever and wherever you are, helping you make fast-paced informed decisions.

-  **Cloud-Based**
being on the Google Cloud Platform means no need for downloads or updates.

-  **Free 30-Day Trial**
peace of mind that Cloud Data Exchange is the right product for you with our no obligation free trial.

-  **Integrate Multiple Systems**
connect Quickbooks to multiple business systems.

-  **Configurable**
customise our off-the-shelf integrations to meet the needs of your business. If we don't already offer the connector you require, we can work with you to produce this.

-  **Security**
being based on the Google Cloud Platform means your data is secure.

-  **Easy to Set-Up**
no need to be an IT expert to get Cloud Data Exchange up and running with our pre-configured mapping, eliminating costly development and implementation fees.
